### **DETAILED ACTION**

1. According to paper filed on Dec. 21, 2005, the applicants have canceled claim 21; amended claims 1, 8, 14 and 22 and furthermore, have added new claim 23.
2. Claims 1-20, 22 and 23 are now pending in the application.

### ***Response to Arguments***

3. Applicant's arguments filed on Dec. 21, 2005 have been fully considered but they are not persuasive regarding prior art rejections. The applicants have amended claims to overcome indefiniteness rejections and some enablement rejections. However, the applicants did not address the enablement rejections of instant claims 8-13 and 22 regarding treatment of specific disease conditions in their response. In regard to prior art rejections, the examiner does not agree with the applicants arguments that amended claims are not anticipated by all of the cited references. The value of Ar as bicyclic heteroaryl encompasses unsubstituted as well as substituted bicyclic heteroaryl groups since the claim language is given its broadest interpretation. Also, the instant compounds are anticipated by Carter's reference when Ar represents carbazole ( tricyclic heteroaryl ring ).

### ***Conclusion***

4. The enablement rejection of instant claims 8-13 and 22 under 35 U.S.C. 112, first paragraph is maintained for the reasons of record.
5. All prior art rejections are maintained for the reasons of record.

NEW      GROUNDS      OF      REJECTION

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claims 1 and 23, the value of variable Ar is defined as bicyclic heteroaryl as well as substituted bicyclic heteroaryl selected from the group consisting of specific four ring structures. Therefore, it is not clear whether bicyclic heteroaryl group mentioned first is the same as defined for the substituted specific bicyclic heteroaryl groups or different from those? If the bicyclic heteroaryl groups are directed to only four ring structures, then claims 2, 6, 9, 13, 15 and 19 lack antecedent basis since Ar can not represent quinoline ring structure according to four specific structures in claim 1.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
